## ACE ELECTIVE Instructor's Guide to ACE Elective

The ACE Elective is divided into 10 sessions. Modules can be used to host a 10-week course or as stand-alone lectures, depending on your needs.

Each session module contains a slide deck, which can be used in its current format or as a slide deck to create a new lecture, a presenter packet with lecture notes that correspond to the slide deck, resources such as pre-readings and videos, and further readings for those who would like to go deeper into a particular topic. A “Syllabus and Learning Objectives” can be found on the website for use with the curriculum.

These resources were created by Subject Matter Experts (SME) specifically for Nurses for Sexual and Reproductive Health. All content has been originated by the author for instructor use. SME bio's and affiliations can be found on our website.

If you use the slide decks and presenter packet, please credit the author. Verbal credit is not necessary, however we request that you include a slide that credits the author.

### **Slide Decks:**

To save instructors time and effort, we have created slide decks that can be used in part or in whole. If you chose to create your own lecture, please feel free to use slides from the relevant slide deck to supplement your lecture.

If you prefer to use the entire deck, you will find that the slide decks are a complete 1.5 hour lecture (with time for Q and A).

### **Presenter Packet:**

Each session module comes with a corresponding Presenter Packet that contains lecture notes and references.
